RE: Cross Generating Station Mercury CEMS data analysis

Dear Mr. Eller:

Per SCDHEC's request, enclosed please find Santee Cooper's report that analyzes and discusses the mercury CEMS data from Santee Cooper's Cross Generating Station Units 1&2. The data indicates that neither Cross 1 nor Cross 2 performs better mercury removal than the proposed MACT floor proposed in Santee Cooper's Pee Dee 112(g) MACT application.

Santee Cooper appreciates your time and effort in reviewing this information. If you have any questions or concerns, please contact Mr. Kevin Clark at either (843) 761-8000 ext. 5193 or kjclark@santeecooper.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jay Hudson', written over a horizontal line.
